NATURAL TRANQUILITY AND TRANSPARENCY

Tranquillity can be experienced in many guises. The most obvious form of tranquillity is found in nature. The shapes, colours and noises found in nature are always in perfect harmony and you never encounter colours or colour combinations that look out of place. Nature offers unrivalled beauty and has no hidden surprises. You see things exactly as they are. Nature is completely transparent.

My aim was to achieve similar harmony in the Bio concept, via design, functionality and atmosphere that oozes natural tranquillity and transparency.

A tranquil look can be achieved because the functions of the Bio Wash and free-standing Bio Mix eliminate the need for wall units in your salon. This creates two islands that interact with each other thanks to their colour, contours and functionality. Transparency is achieved via your way of working. The Bio Mix allows colours to be prepared in plain sight of customers; like in an open kitchen concept.

The quadratic forms of the Bio Style, Bio Chair and Bio Desk complete the tranquil appearance and help to create a harmonious and transparent salon.

Experience the Bio Range.

VINTAGE WINE

SCHWARZ

The Bio Wash two-seater, which features a chic 'Ahorn After Eight' wood decor, a matt-black shampoo tray and 'Vintage Wine' upholstery, takes you into the inviting rustic atmosphere of an old wine cellar.

With the integrated shampoo tray bottles of shampoo can be placed immediately next to the wash basin. This creates harmony and results in a salon with a warm, tranquil look.

BIO WARM

BIO COOL

This set has a serene, cool appearance thanks to its combination of 'Marmor Carrara' wood decor, high-gloss white shampoo tray and upholstery in 'Bull Anthrazit'. Tranquil and harmonious areas can be created by using a common design where the same materials and colours are repeated. This allows the displayed Bio Wash three-seater, Bio Style and Bio Chair to all interact with each other.

In order to further highlight the streamlined contours, the Bio Chair has been fitted with a square Disc Base that accentuates the chair's attractive quadratic shape.

WEISS

The combination between its light oak colour 'Sonoma Eiche Trüffel', high-gloss white elements and 'Buffalo Fango' upholstery is soft, chic and appealing to the eye. To match the metal of the Bio Wash and the tap of the Bio Mix, the Bio Chair in this set features an aluminium star base with sliders.

The Bio Wash has been placed opposite the Bio Mix. Customers can thus clearly see all colouring preparations.

BIO PURE

This Bio Wash three-seater and the Bio Chair with black star base on sliders have a pure, no nonsense appearance. The combination between the 'Marmo Roma' wood decor, matt black shampoo tray and 'Bull Schwarz' upholstery gives this set a look of purity and tranquillity. The colour helps to create harmony, while the structure adds the required variation.

BIO WASH features

The Bio Wash features integrated spaces for inventory and waste. The shallow draws mean folded towels and hair foil can be kept close by and used whenever necessary.

The wide lower drawers are ideal for storing shampoo, conditioner and other supplies. The narrow drawers of the Bio Wash are able to conceal two bins, which can be used for general waste and wet towels.

The “Push to open” drawers feature a ‘soft close’ fastening and can be opened with your elbow or knee. This means you can keep your hands free to serve your customers.

The Bio Wash is a modular wash unit, which can be expanded from a two-seater to create a washing island with as many places as you require. The Bio Wash is equipped with a deep, adjustable basin which features an integrated hand shower and removable siphon. An optional rubber neck support offers extra washing comfort. Bottles of shampoo and conditioner can be placed next to the wash basin, on a removable and easy to clean stainless steel grid.

The Bio Wash is available with an optional electrical leg-piece and back massage feature.

Hairdressers can operate the back massage feature and electrical leg-piece from behind the wash basins.

The wide arm-rests of the Bio Wash are not only comfortable for customers, but also offer hairdressers space to, for example, perform hand massages, manicures or quick facial treatments.

BIO STYLE features

The Bio Style is unique because of the mirror that runs to below the work surface.

The mirror offers storage space on both sides. You can also adjust the position of the mirror in relation to the work surface. A long horizontal set-up can be created by joining the worktops behind the mirror, as shown in the picture. You can also create a unique cutting location by hanging the mirrors asymmetrically from the centre of the worktop.

BIO DESK

The Bio Desk combines streamlined contours and attractive design. The Bio Desk is available with two or three cabinets and can be freely customised in terms of doors and/or drawers. Just like the Bio Style & Bio Wash, the framework is available in black or high-gloss white.

The Bio Mix is the finishing touch to the Bio Range. The Bio Mix allows you to effectively prepare for the colouring process. If you prefer complete transparency, a glass corner-screen around the wash basin will be ideal. If you prefer more privacy, then you can opt for the opaque version.

X-BASE BLACK

Aluminium star base with black powder coating on five wheels and central brake. Hydraulic lockable pump with black housing.

DISC-BASE

Stainless steel disc with a diameter of 55 cm. Hydraulic lockable pump with stainless steel housing.

DISC-BASE

Stainless steel disc, 50 cm square. Hydraulic lockable pump with stainless steel housing.

FIX-BASE

Stainless steel disc with a diameter of 21 cm. Hydraulic lockable pump with stainless steel housing.

PROTECTIVE CASE

To help keep your Bio Chair or Bio Wash as-new for as long as possible, we advise using a protective case. So use the protective case to protect the back of the chair and washing unit when dying hair. A protective case for the leg-piece helps to prevent damage caused by footwear.
